            <cdwa:descriptiveNote>This is the Seikilos stele. The
Seikilos stele is a fragment of a monument from
                a tomb. It is believed to have been extracted near
the city Aydın in 1883 before being recognized again in Smyrna in
1922. These location in western Turkey, were Greek territory in
antiquity. This
                    marble stele is exception due to its twelve-line-
long inscription, five lines of which
                        describes the man Seikilos who dedicated the
stele, and the remaining six lines are known as
                            the Seikilos epitaph.</cdwa:descriptiveNote>
